

ALLOCATIONS – WIA Youth Program Contractors

Attached are the WIA Youth baseline and ARRA allocations for FY 09-10. The funding distribution methodology, defined by the Department of Labor, required distributing the funds proportionately throughout the County based on three equally weighted factors:

- Areas of substantial unemployment (using State EDD 2007/2008 unemployment data)
- Areas with excess unemployment (using State EDD 2007 and 2008 unemployment data)
- The percentage of disadvantaged youth based on 2000 Census data

CSS looked at the cities/areas each Youth contractor served and determined the average percentage of the above 3 factors. Each contractor was then allocated that percentage of the funding. Any questions can be directed to your Contract Administrator.
