APPENDIX K FOR YOUTH RFSQ 2012

COUNTY OF LOS ANGELES
DEPARTMENT OF COMMUNITY AND SENIOR SERVICES

YOUTH PROGRAM
APPENDIX K: STATEMENT OF WORK

PREAMBLE

For over a decade, the County of Los Angeles (County) has collaborated with its community partners to enhance the capacity of the health and human services system to improve the lives of children and families. These efforts require, as a fundamental expectation, that the County’s contracting partners share the County and community’s commitment to provide health and human services that support achievement of the County’s vision, goals, values, and adopted outcomes. Key to these efforts is the integration of service delivery systems and the adoption of the Customer Service and Satisfaction Standards.

The County of Los Angeles’ Vision is to improve the quality of life in the County by providing responsive, efficient, and high quality public services that promote the self-sufficiency, well-being and prosperity of individuals, families, business and communities. This philosophy of teamwork and collaboration is anchored in the shared values of:

- Responsiveness
- Professionalism
- Accountability
- Compassion
- Integrity
- Commitment
- A Can-Do Attitude
- Respect for Diversity

These shared values are encompassed in the County Mission to enrich lives through effective and caring service and the County Strategic Plan’s eight goals: 1) Service Excellence; 2) Workforce Excellence; 3) Organizational Effectiveness; 4) Fiscal Responsibility; 5) Children and Families’ Well-Being; 6) Community Services; 7) Health and Mental Health; and 8) Public Safety. Improving the well-being of children and families requires coordination, collaboration, and integration of services across functional and jurisdictional boundaries, by and between County departments/agencies, and community and contracting partners.

The basic conditions that represent the well-being we seek for all children and families in Los Angeles County are delineated in the following five outcomes, adopted by the Board of Supervisors in January 1993.

- Good Health;
APPENDIX K FOR YOUTH RFSQ 2012

- Economic Well-Being;
- Safety and Survival;
- Emotional and Social Well-Being; and
- Education and Workforce Readiness.

Recognizing no single strategy - in isolation - can achieve the County’s outcomes of well-being for children and families, consensus has emerged among County and community leaders that making substantial improvements in integrating the County’s health and human services system is necessary to significantly move toward achieving these outcomes. The County has also established values and goals for guiding this effort to integrate the health and human services delivery system:

- Families are treated with respect in every encounter they have with the health, educational, and social services systems.
- Families can easily access a broad range of services to address their needs, build on their strengths, and achieve their goals.
- There is no “wrong door”: wherever a family enters the system is the right place.
- Families receive services tailored to their unique situations and needs.
- Service providers and advocates involve families in the process of determining service plans, and proactively provide families with coordinated and comprehensive information, services, and resources.
- The County service system is flexible, able to respond to service demands for both the Countywide population and specific population groups.
- The County service system acts to strengthen communities, recognizing that just as individuals live in families, families live in communities.
- In supporting families and communities, County agencies work seamlessly with public and private service providers, community-based organizations, and other community partners.
- County agencies and their partners work together seamlessly to demonstrate substantial progress towards making the system more strength-based, family-focused, culturally-competent, accessible, user-friendly, responsive, cohesive, efficient, professional, and accountable.
- County agencies and their partners focus on administrative and operational enhancements to optimize the sharing of information, resources, and best practices while also protecting the privacy rights of families.
- County agencies and their partners pursue multi-disciplinary service delivery, a single service plan, staff development opportunities, infrastructure enhancements, customer service and satisfaction evaluation, and revenue maximization.
County agencies and their partners create incentives to reinforce the direction toward service integration and a seamless service delivery system.

The County human service system embraces a commitment to the disciplined pursuit of results accountability across systems. Specifically, any strategy designed to improve the County human services system for children and families should ultimately be judged by whether it helps achieve the County’s five outcomes for children and families: good health, economic well-being, safety and survival, emotional and social well-being, and education and workforce readiness.

County departments' strategic plans for achieving these goals include: efforts to become more Consumer/client-focused; valuing community partnerships and collaborations; emphasizing values and integrity; and using a strengths-based and multi-disciplinary team approach. County departments are also working to provide the Board of Supervisors and the community with a better understanding of how resources are being utilized, how well services are being provided, and what are the results of the services, and to determine: is anyone better off?

The County of Los Angeles health and human service departments and their partners are working together to achieve the following Customer Service and Satisfaction Standards in support of improving outcomes for children and families:

**Personal Service Delivery**

The service delivery staff and volunteers will treat customers and each other with courtesy, dignity, and respect.

- Introduce themselves by name
- Listen carefully and patiently to customers
- Be responsive to cultural and linguistic needs
- Explain procedures clearly
- Build on the strengths of families and communities

**Service Access**

Service providers will work proactively to facilitate customer access to services.

- Provide services as promptly as possible
- Provide clear directions and service information
- Outreach to the community and promote available services
- Involve families in service plan development
- Follow-up to ensure appropriate delivery of services

**Service Environment**

- Ensure a safe environment, which supports the effective delivery of services.
- Ensure a professional atmosphere
Display vision, mission, and values statements
Provide a clean and comfortable waiting area
Ensure privacy
Post complaint and appeals procedures

The basis for all County health and human services contracts is the provision of the highest level of quality services that support improved outcomes for children and families. To that end, the County and its contracting partners must work together and share a commitment to achieve a common vision, goals, outcomes, and standards for providing services.
